- Postman

EXPERIENCE

Software Engineer, The American Board of Anesthesiology - *Raleigh, NC*

Jan. 2022 - Present

- Design full stack, multi-page/component applications using SQL, C#, React and React Native to serve anesthesiology programs internationally.
- Troubleshoot and debug pull requests pushed by teammates.
- Responsible for tickets from the start of development until it is moved into production; this includes the entirety of development on all levels as well as releasing the ticket to different stages in Azure DevOps.

Product Design/VAVE Engineer, Tenneco - *Skokie, IL*

Jan. 2020 - Jan. 2022

- Created React.js application that matches part attributes to raw material database, thereby generating hundreds of thousands of dollars in profit.
- Key player in generating over \$500,000 in savings within less than a two year period.

Product Design Engineering Intern, Tenneco - *Skokie, IL*

May 2019 - Aug. 2019

- Reduced CAD design time by nearly 80% by integrating modern technologies to the Tenneco process.
- Managed key projects for internal part design and reverse engineering of products.

EDUCATION

Full Stack Web Development Bootcamp, NuCamp - *Chicago, IL* Summer 2021

Automotive Engineering BS, Ferris State University - *Big Rapids, MI* Winter 2019

AWARDS

2019 President of the Year

Ferris State University

- This award is presented to an organization's president who exemplifies the highest standards of leadership.
